

## PATIENT POST-SURGERY MEDICATION TRACKER

Medications can only be effective when taken properly. Use this tool to remind you to take the correct dose of the right medication at the right time. Carefully review instructions you received from the hospital. Instructions will tell you:

 which medications to start taking changes to existing medications
which medications to stop taking

<b>Fill in the names of the med</b> Example:	icatio	ns using	your Af	ter V	isit	Sum	ma	ary o	r <b>D</b> i	iscl	har	ge l	nst	ruc	tion	ıs fı	rom	the	e ho	spi	tal.

**CAUTION:** Follow physician medication instructions and read the pharmacy medication labels/inserts for important dosing and side effect information. Medications will vary based on the patient medical history, current medications, medication allergies, etc. Cross out any row for medications that do not apply to you.
